

JD HONIGBERG INTERNATIONAL

X-RAY FILM PROCESSORS

FI-75

*The **FI-75** is the world's premier 90 second automatic x-ray film processor able to handle film volumes from very low to a higher capacity. Efficient with energy, water & chemical use, it saves the money while delivering outstanding quality images.*

Features & Benefits

- Lightweight yet rugged tabletop processor
- 90 second processing speed, leading edge to leading edge
- Energy and water saving design limits run time to when film is actually being processed
- Anti-oxidation and anti-crystallization programs result in chemical savings and outstanding image quality
- Intelligent replenishment sensor limits chemical use resulting in chemical savings
- All components are easily accessible underneath for service
- Temperature control on the front panel for ease of use
- Top film feed and top return for convenience
- Film transport rack design with spring loaded rollers helps eliminate film jam problems found with other brands
- Quality polyurethane & rubber rollers for outstanding image quality and no artifacts
- 2 year warranty
- Meets ISO, IEC, CE, TUV, CSA & UL quality standards
- Made in Germany
