

# Small, Lightweight, Powerful Suction

**SSCOR**  
**QUICKDRAW®**

The SSCOR Quickdraw provides suction as efficient as a large aspirator but weighs only 2.6 pounds (1.18kg). The Quickdraw easily fits into an airway bag so you can have quality medical suction available at the patient's side.

For the first time ever a medical aspirator can be powered by alkaline battery technology! Alkaline battery technology is ideal for small portable devices carried in kits. Alkaline batteries have a

long shelf life, require no charging, pack a lot of power for long run times and are widely available and inexpensive.

SSCOR offers an alkaline battery pack which will power the Quickdraw for 3 hours. And now SSCOR also offers the all new 'AAA' battery holder which accepts standard off the shelf 'AAA' alkaline batteries.

The Quickdraw is also available in a rechargeable version.

**Quickdraw is the ideal aspirator to carry in your 'first in' kit and have on hand every time you are with the patient.**

# Quickdraw! Have it ready to use at your side on every call!

## Options

#2403 Disposable Alkaline Batteries	#2400RCS* & #2400 (Domestic US) #2400RCS-230* & #2400-230 (International) Sealed Lead Acid Rechargeable Battery
--	---

Size	10.5" L x 4.5" H x 4.35" W    27cm L x 11cm H x 11cm W	
Weight	2.6 lbs or 1.18 kg	
Performance	Maximum negative pressure >500mmHg; Low negative pressure setting approximately 80 - 100mmHg	
Collection Canister	300 cc/ml capacity; 99.98% bacterial effective filter
