On stripping attached securely to a wall

On stripping inside a cabinet

Shelf size options and SKU (stock keeping unit) capacity per shelf

Shelf Width (mm)	Shelf Depth (mm)		
	305	405	505
595	8 - 9	8 - 9	8 - 9
910	12 - 13	12 - 13	12 - 13

Pull Out Tray shelves are the number 1 hospital seller in Australia as customers like the following:

- Large Number of medications can be stored in a small footprint
- Shelves pull out which means new stock can easily be loaded at the back to optimise stock rotation.
- Divider system is best in class
- Modular – can be added to, moved or reconfigured depending on need
- Gives area a professional look
- Flexible – 3 angles for shelves possible, number of shelves as per requirements, spacing of shelves can be adjusted to meet requirements

2. Storage for larger items eg bottles, bulk medications, bulk items

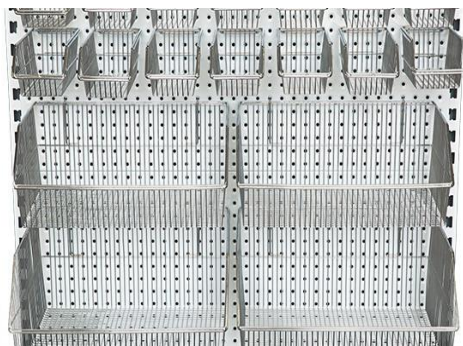

Flat Shelves:

- Available in same dimensions as Pull Out Shelves
- Can be mounted with same options as Pull Out Shelves
- Can also be set at 3 different angles

3. Storage for ancillary items eg Cannulas, Bungs, Needles, Syringes, Swabs, Red Caps, Bandages etc.

Wire Baskets:

- Punch panel can be installed on gondolas which makes it possible to mix and match baskets with Pull Out Shelves and Flat shelves
- Baskets can be mounted on wall stripping appropriately attached to the wall or inside a cabinet
- Baskets are available in many sizes to allow for a perfect fit for requirements
- Baskets can be supplied with dividers to allow more than one item per basket

4. Storage of medications, IV's and larger items

Integrated storage and workbenches:

- Underbench storage can be customised to include different options eg medication drawers, large wire baskets for IV's and flat shelves for larger items.
- System is modular and can easily be configured to suit customers' requirements
- Modular system can be made at different heights for either sitting or standing
- Can be integrated with pull out shelving, flat shelving or baskets on wall stripping and positioned overhead
